Document Purpose and Audience

This document is an SDS (Software Design Specification) document. It outlines the design of the software and describes its features, functionalities, architecture, and technical specifications.

The target audience for this document includes software developers, software architects, project managers, and quality assurance teams. It may also be reviewed by stakeholders such as customers, clients, or investors who are interested in understanding the technical details of the software design.

II. Class Diagram(s)

Look at **TOFFEE Class Diagram.pdf** in the same folder.

III. Class Descriptions

Class ID	Class Name	Description & Responsibility
1.C01	User	Entity class have users info
2.C02	Item	Entity class have items info
3. C03	catalog	Entity class have list of items Responsible for searching for items and viewing items
4. C04	User Address	Entity class carries the address info of user
5. C05	Shopping Cart	Entity class has items to buy Responsible for carrying products to make an order
6. C06	Order	Entity Class responsible for saving order , making orders to customers
7. C07	Owner	Owner of the company can assign and remove admins
8. C08	Admin	Admin have privileges to perform many actions as the owner
9. I09	Admin Actions	This interface responsible for admin actions like adding , removing or updating items in catalog , suspend users , show statistics
10. C10	Payment Method	Abstract class responsible for verifying payment method
11. C11	Cash	Child class responsible for delivering order to customers
12. C12	Voucher	User can buy and redeem Vouchers to decrease the total price of order
13.C13	Wallet	Is-a payment method like Fawry , etc.. .

Class - Sequence Usage Table

Sequence Diagram	Classes Used	All Methods Used
1. Register	User Manager	displayMainPage():void register():void fillRegisterForm():void validateRegisterInfo():bool sendOTP():void verifyOTP():bool storeAccountInfo():void
2. login	User Manger	Login():void SearchUser(User user):bool getStatus():string sendOTP():void verifyOTP():bool SaveNewPassword(string)
3. view catalog	Manager Catalog	viewCatalog():void getCatalog() : catalog
4. select item and to cart	Manager Shopping Cart	runCart():void selectItem(Item:) : Item viewItemInfo (Item : item) : void addItemToCart (Item : item) : void
5. mange shopping cart	Manager Shopping Cart	manageCart():void showCart () : void removeItemFromCart (Item : item) : void
6. Check Out	Manager Order User Wallet Cash	checkout():void isLoggedIn() = false cartSize(): int chooseNewAddress(Address): redeemOptions(): choosePaymentMethod():void getTotalPrice() : double verifyPayment():void showOrderdetails():void
